Moderator's Welcome

09:00 - 09:05

Leverage technology and talent to collaborate, communicate and succeed

Keynote address

09:05 - 09:25

Leverage technology and talent to collaborate, communicate and succeed

The Science of Better Work Culture

09:25 - 09:50

Leverage technology and talent to collaborate, communicate and succeed

- How you can improve creativity
 - How you can improve teamwork
 - How you can make people feel more connected to work
-

Headline panel session: Which comes first - Culture or Technology?

09:50 - 10:30

Leverage technology and talent to collaborate, communicate and succeed

- How is the future workforce driving a change of culture in the workplace? Is it due to the technology they already have access to or is it more a behavioural trait first?
 - What technologies will you need to support your new infrastructure and working culture?
 - How can technology ensure a highly productive future workforce vs nice to haves which are more geared towards a culture perception?
 - Can technology bridge the generational gap? With many businesses trying to drive change whilst maintaining their cost base, how can you measure ROI?
-

Morning networking break

10:30 - 11:00

Leverage technology and talent to collaborate, communicate and succeed

Live Interview: What does current and future leadership look like?

11:00 - 11:45

Leverage technology and talent to collaborate, communicate and succeed

Moot point: Automation will change human resource as we know it. Will it also be a further catalyst for inequality and diversity in the workplace?

11:45 - 12:15

Leverage technology and talent to collaborate, communicate and succeed

Listen to a lively debate focusing on a controversial topic at the forefront of current and future workforce discussions

- How will automation resource selection in the future?
 - Will it create a wider gap in wage and gender inequality if it is most likely to replace lower paid job?
 - Is automation going to change the skill set of the future workforce?
-

Panel session Human vs Machine – where are you looking for your next talent?

12:15 - 13:00

Leverage technology and talent to collaborate, communicate and succeed

40% of roles have been lost in automation

- Training and Development over money – how can you save your cost base through technology?
 - How do you prepare to retain your employees?
 - How are contracts going to change with more flexible working conditions?
 - How does the gig economy impact the business owner?
 - What is “more than just a job” for the next generation?
 - How will automation change the way you recruit?
 - If it's no longer about climbing the corporate rank, then what is it about?
-

Networking lunch break

13:00 - 14:00

Leverage technology and talent to collaborate, communicate and succeed

Panel session: Is the techno generation avoiding facetime?

14:00 - 15:00

Leverage technology and talent to collaborate, communicate and succeed

- How can businesses create a more transparent culture through the use of technology regardless of worker location?
- How can you create a flexible approach to work whilst being able to give very regular feedback and encouragement?
- How can you use technology to empower workers' personal lives to drive communication and innovation in the workplace?

Afternoon networking break

15:00 - 15:30

Leverage technology and talent to collaborate, communicate and succeed

Man and machine as a winning team: Panel session: Making collaborative activities more productive to build talent based competitive advantages

15:30 - 16:30

Leverage technology and talent to collaborate, communicate and succeed

- How does collaboration impact productivity across a company?
 - What does a technology ecosystem that includes social networking, instant messaging video on demands and blogs look like?
 - How do you benchmark an ROI on collaboration when making decisions on where to invest?
-

Future of Work networking party

16:30 - 17:30

Leverage technology and talent to collaborate, communicate and succeed

details to be announced soon...
