

SESSIONS

DAY ONE - BLOCKCHAIN FOR BUSINESS SUMMIT - 12/06/2019

Blockchain for Business Summit

12 - 13 June 2019

ExCel
London

Registration at TechXLR8!

09:00 - 09:30

Welcome from the Chair, with setting the scene for blockchain in business and business card exchange in the audience

09:30 - 09:40

Blockchain for Business Summit

Participants

Eric Van der Kleij - Chief Executive, Frontier Network

Keynote presentation: Decentralised mobility - An end to end landscape based on digital identities, IoT and distributed ledger technology

09:40 - 10:00

Blockchain for Business Summit

- Understanding why the future of mobility will be shaped by the advent of C.A.S.E: Connected, Autonomous, Shared and Electric vehicles
- How vehicles will be consumed as a service (VaaS or MaaS) rather than be owned
- Why service platforms need scalability to succeed
- Analysing why only pure end-to-end software solutions can deliver on this level of scalability
- How the combination and integration of Blockchain/DLT and IoT technology with fully digital KYC, digital ID and eContracting can provide the needed technology
- Emphasising the need for open exchange protocols and interfaces in order to avoid rent-extracting monopoly platforms

Participants

Harry Behrens - Head of the Blockchain Factory, Daimler Financial Services AG

Using Blockchain for Social and Environmental impact

10:00 - 10:20

Blockchain for Business Summit

Ron will present the story of Plastic Bank and their initiatives to reduce ocean bound plastic and create a token based banking system to help the world's poorest people. He will discuss how Cognition Foundry has used Blockchain technology to engender trust in very challenging environments and how that has helped Plastic Bank establish an expanding global presence.

Participants

Ron Argent - CEO & Founder, Cognition Foundry

Panel debate: Pro vs. against the costs vs. the benefits from blockchain in business

10:20 - 10:50

Blockchain for Business Summit

This panel debate is made up from panel members who have an extensive experience and strong opinions on blockchain, when comparing its costs and benefits in business:

- Is blockchain useful at all in specific businesses? Why? When? Where? In which circumstances?
- Getting to the bottom of when blockchain can add value and when it can't
- Analysing the costs vs. the benefits of blockchain: What does it really take to deploy blockchain and will the business really benefit?
- How long does it take for blockchain to pay off?
- Questioning the future scalability of blockchain projects vs. the costs it will bring

Participants

Panel moderator: Jonny Voon - Innovation Lead for IoT and Distributed Ledger, Innovate UK

Mitesh Savjani - Innovation Product Manager, Santander

Dora Matheidesz - Senior Innovation Manager, HSBC

Govert Van Ek - Co-Founder, BitCar

Blockchain in Agriculture: Building Trust and Traceability

10:50 - 11:10

Blockchain for Business Summit

Participants

Neeraj Kashyap - Director - Business Development (UK & Europe), Nihilent

Morning Break and Networking

11:10 - 11:50

Blockchain for Business Summit

LEADERSIN SESSION: BLOCKCHAIN IN FINANCE

11:10 - 11:50

LeadersIn Blockchain roundtables

LeadersIn Blockchain: An opportunity to join closed-door small group roundtable discussions (up to 15 attendees) in 45min blocks, taking place after use case presentations and hosted by speakers from specific verticals to explore the potential of blockchain in that vertical industry.

This particular LeadersIn session will discuss blockchain in finance.

Participants

Dora Matheidesz - Senior Innovation Manager, HSBC

Enterprise blockchains as digital transformation enablers

11:50 - 12:10

Blockchain for Business Summit

- Why does Enterprise Blockchain matter for digital transformation?
- How can Enterprise Blockchain help corporations become digital businesses?
- Examples from the financial services

Participants

Dean Demellweek - Digital Transformation Leader and Blockchain Evangelist, BNP Paribas

Bank of England on the blockchain; what next?

12:10 - 12:30

Blockchain for Business Summit

- How blockchain fits with the mission of a central bank
- A brief history of BoE blockchain research from cryptocurrencies to payment systems
- What we have learned and how it has affected the work we are doing
- What we are doing next to deploy blockchain and support the fintech economy

Participants

William Lovell - Head of Future Technology, Bank of England

Blockchain in Trade Finance; where are we?

12:30 - 12:50

Blockchain for Business Summit

- Rabobank's journey on getting blockchain into trade finance
- Current challenges and potential solutions
- A future view of the industry

Participants

Chris Huls - Lead Tech Labs, Rabobank Netherlands

LEADERS IN SESSION: BLOCKCHAIN IN BANKING

12:30 - 13:20

LeadersIn Blockchain roundtables

LeadersIn Blockchain: An opportunity to join closed-door small group roundtable discussions (up to 15 attendees) in 45min blocks, taking place after use case presentations and hosted by speakers from specific verticals to explore the potential of blockchain in that vertical industry.

This particular LeadersIn session will discuss blockchain in banking.

Participants

William Lovell - Head of Future Technology, Bank of England

SESSIONS

DAY ONE - BLOCKCHAIN FOR BUSINESS SUMMIT - 12/06/2019

Blockchain for Business Summit

12 - 13 June 2019

ExCel
London

Panel debate: Pro vs. against - Public, private or hybrid blockchain?

12:50 - 13:20

Blockchain for Business Summit

- Debating the benefits and downsides of public vs. private vs. hybrid blockchains
- Does a private enterprise blockchain even bring any value that blockchain is meant to bring as a decentralised platform? Is it even blockchain?
- On the other hand, how could companies in sensitive industries even afford to have a decentralised blockchain system?
- What are different consortia doing and how are they building their open blockchains today?
- What about the different verticals – Which blockchains are suitable for which vertical?

Participants

Eric Van der Kleij - Chief Executive, Frontier Network

Michele Curtioni - VP - Digital Product Development & DLT, State Street

Marta Piekarska - Director of Ecosystem, Hyperledger

Erik Beijnoff - Creator of the Repertoire Network, Repertoire

Chris Huls - Lead Tech Labs, Rabobank Netherlands

Exploring the blockchain use cases from the perspective of Hyperledger

13:20 - 13:40

Blockchain for Business Summit

- Use cases of blockchain - how to differentiate good from bad?
- Business blockchain solutions
- Study of general application in enterprise settings
- What have we learnt so far which can be useful to most enterprises considering blockchain?

Participants

Marta Piekarska - Director of Ecosystem, Hyperledger

LEADERS IN SESSION: BLOCKCHAIN IN MUSIC & CREATIVE INDUSTRIES

13:20 - 13:40

LeadersIn Blockchain roundtables

Participants

Erik Beijnoff - Creator of the Repertoire Network, Repertoire

Lunch

13:40 - 14:30

Blockchain for Business Summit

Lunch

13:40 - 14:30

LeadersIn Blockchain roundtables

Use case: Showcasing the impact blockchain technology on the integration of medical data and healthcare IoT to inform diagnosis and treatment

14:30 - 14:40

Blockchain for Business Summit

- How patient data is scattered across different entities in the value chain of the healthcare industry, and remains a key restrictor to achieving integrated care across health and social boundaries
- Challenges to delivering robust, positive patient outcomes which blockchain can help solve
- In a world where patient-centricity is key, how can blockchain deliver a solution acting as a high trust platform, promoting data ownership and sharing through incentivisation?
- The potential of blockchain as a healthcare data solution, drawing upon a use case from a payer-provider joint venture and showcasing the impact blockchain technology can have as a bridge for the integration of medical data and healthcare IoT to inform diagnosis and treatment

Participants

Anushka Patchava - Expert Advisor, Healthcare, Artificial Intelligence and Blockchain, United Nations (CEFACT)

Panel debate: What does blockchain mean for healthcare? Can it resolve the administration burden, lack of patient ownership and billing issues?

14:40 - 15:10

Blockchain for Business Summit

- What are the realistic benefits vs. challenges of blockchain in healthcare?
- What will be the cost of building a blockchain for healthcare providers?
- Will it pay off?
- How long will this realistically take?

Participants

Panel moderator: Stewart Southey - Founder, Catena Consulting

Amit Patel - Director, Black Swan Advisors

Anushka Patchava - Expert Advisor, Healthcare, Artificial Intelligence and Blockchain, United Nations (CEFACT)

Robert Learney - Lead Technologist - Blockchain & DLT, Digital Catapult

Aman Gupta - NHS Navigator, DigitalHealth.London Accelerator

Natalie Pankova - Chief Operating Officer, Metadvice

Use case: Successful blockchain implementations in the insurance industry - Automation, identity verification, removal of middle men

15:10 - 15:30

Blockchain for Business Summit

- Improving claims processing through automation and how provenance is one major area where insurers can take advantage of blockchain
- How blockchain can help with underwriting, giving underwriters ability to source data from external sources to automate some aspects of underwriting
- Removal of middle men and third parties in insurance through blockchain
- Client On-Boarding through easier identity verification on a blockchain platform
- Considering blockchain legal implications and the speed of blockchain adoption in insurance to build better blockchain use cases in the future

Participants

Vivek Zakarde - Head of Data Analytics, Reliance General Insurance

Blockchain – A Use Case Deep Dive

15:30 - 15:50

Blockchain for Business Summit

Blockchain is one of the hottest topics in the market today, many enterprises are talking or thinking about the technology. A number have done one or more proof of concept, but when it comes to actual production use cases there are considerably fewer enterprises in this position. During this session, Oracle will showcase actual use cases implemented by Oracle customers covering the following areas: manufacturing and logistics, Public Sector, shipping and distribution, retail, food and beverage, along with the financial services.

What you will take away from this session:

- A deep dive into Blockchain – one of the hottest topics in the market today
- Sectors covered; manufacturing and logistics, Public Sector, shipping and distribution, retail, food and beverages, along with the financial services.
- Learn how to adopt blockchain and transform your enterprise
- Direction on the next innovative stage in the Blockchain evolution
- Demo and more details available at the Oracle exhibition stand

Participants

James Allerton-Austin - Senior Director of Product Management, Common Cloud PaaS, Oracle

Simon Nicholson - Senior Director, Product Management, IoT and Blockchain Cloud Applications, Oracle

SESSIONS

DAY ONE - BLOCKCHAIN FOR BUSINESS SUMMIT - 12/06/2019

Blockchain for Business Summit

12 - 13 June 2019

ExCel
London

Afternoon break and networking

15:50 - 16:10

Blockchain for Business Summit

Building a financial industry-led initiative to create broad interoperability between business networks running on DLT and conventional systems

16:10 - 16:30

Blockchain for Business Summit

- Analysing the 5 major fields of actions for standardization to work on, including data formats, network protocols, attestation frameworks, digital Identities, smart contracts and Oracle services
- How the financial industry started the UTN standardization initiative
- Why the Universal Trade Network will be to trade what the internet was to information
- Openness of the project, inviting all industries to join and beyond the limits of the financial industry

Participants

Hans Huber - Senior DLT Project Lead, Commerzbank

Panel debate: Interoperability of blockchain platforms and ecosystems

16:30 - 17:00

Blockchain for Business Summit

- How will blockchain lead to more network-based collaboration?
- How will blockchain work when companies use different strategies with data and ERP systems
- How do you embed blockchain into a system with lots of systems?
- Is data the biggest problem for blockchain, as interoperability is difficult when data organisation strategies are different?
- What are companies like FANG (Facebook, Amazon, Apple, Netflix and Google) doing about this?

Participants

Panel moderator: James Crawshaw - Senior Analyst, Intelligent Networks & Automation, Heavy Reading

Hans Huber - Senior DLT Project Lead, Commerzbank

Samuel Dare - Founder, Genysys

Andreas Manolis - Head of Strategy & Risk, Group Business Assurance, BT

Use case: Token4Hope/DCore - A real-world case study of creating positive social impact by combining charity and blockchain

17:00 - 17:20

Blockchain for Business Summit

- Understanding how blockchain provides transparency
- Providing trust between stakeholders - donors, recipients, charities and retailers
- Simplifying the flow of funds and donations
- Securing the distribution chain from donors to recipients

Participants

Michal Geci - Head of Innovations, Decent

LEADERS IN SESSION: BLOCKCHAIN IN FINANCE AND THE POTENTIAL FOR REAL INTEROPERABILITY AMONG ALL INDUSTRIES

17:00 - 17:45

LeadersIn Blockchain roundtables

LeadersIn Blockchain: An opportunity to join closed-door small group roundtable discussions (up to 15 attendees) in 45min blocks, taking place after use case presentations and hosted by speakers from specific verticals to explore the potential of blockchain in that vertical industry.

This particular LeadersIn session will discuss blockchain in finance and the potential for real interoperability among all industries.

Participants

Hans Huber - Senior DLT Project Lead, Commerzbank

Panel debate: Interconnecting blockchain with other technologies – How to?

17:20 - 17:50

Blockchain for Business Summit

- How can blockchain be interconnected to technologies such as AI, machine learning, cloud, IoT and more?
- What are different regions around the world doing about this?
- How exactly do AI or IoT interconnect with blockchain, what are the exact practices, what are the adoption methods?
- Debating the usability of blockchain on its own vs. with other new technologies
- Bridging the gap between physical and digital worlds by combining blockchain with AI, machine learning, IoT, AR/VR
- Securing the first and last mile of integrated technology projects

Participants

Panel moderator: Paul Sullivan - CEO, BIAS

Jean-Marc Bonnefous - Founder and Managing Partner, Tellurian Capital

Paul Dilorito - Director of Innovation and Partnerships, PRS for Music

Lia Almeida - Co-founder & CMO, The Blockchain Group (TBG)

Announcement of the Blockchain Innovator Award

17:50 - 18:05

Blockchain for Business Summit

Participants

Eric Van der Kleij - Chief Executive, Frontier Network

Networking Drinks

18:00 - 19:00

LeadersIn Blockchain roundtables

Networking Drinks

18:05 - 19:05

SESSIONS

DAY TWO - BLOCKCHAIN FOR BUSINESS SUMMIT - 13/06/2019

Blockchain for Business Summit

12 - 13 June 2019

ExCel
London

Welcome from the Chair

09:30 - 09:40

Blockchain for Business Summit

Participants

Eric Van der Kleij - Chief Executive, Frontier Network

Overview of Blockchain use cases and the EU Observatory and Forum

09:40 - 10:00

Blockchain for Business Summit

- Blockchain use cases in the Netherlands across industries: Pensions, Education, Logistics
- How can blockchain really help in real life?
- How will blockchain affect businesses, business models, society and education?

Participants

Jolanda ter Maten - Member EU Blockchain Observatory & Forum, Jolanda ter Maten Business Consultancy

Blockchain in production in a 185-year-old company

10:00 - 10:20

Blockchain for Business Summit

- How in a corporate can you launch innovative solutions?
- What are the real-life challenges of blockchain?
- Lessons learnt

Participants

Maarten Ectors - Chief Innovation Officer, Legal and General

Panel debate: Blockchain use cases around the world - The who, what, how and why of blockchain in business today

10:20 - 10:50

Blockchain for Business Summit

- Who's doing what that's relevant with blockchain right now?
- Regional perspectives on blockchain from Europe, US, Latin America, Africa, Asia, Australia
- Identifying what blockchain is useful and useless for, depending on the industry and potential use case
- How are business models for blockchain developing around the world?

Participants

Panel moderator: Ruomeng Wang - Research and Analysis Manager, Fintech & Blockchain Intelligence Service, IHS Markit

Maarten Ectors - Chief Innovation Officer, Legal and General

Disa Lee Choun - Director Head of Innovation within the Global Clinical Sciences & Operations, UCB

Michelle East - Founder, Certainty Compliance

Kanaway Yusingco - Founder and Managing Partner, Uniquely Wired

Keynote use case: Creating a smart city with blockchain as its key building block

10:50 - 11:10

Blockchain for Business Summit

- Overview of how blockchain can be utilised in various use cases within a smart city
- An example of a smart city being developed with blockchain at its core
- Integrating the physical and digital worlds in a smart city with the help of blockchain
- How blockchain can help secure identity and mobility within a smart city
- How blockchain can integrate with other new technologies, such as AI, IoT, AR/VR and more within a smart city

Participants

Sohail Munir - Advisor for Emerging Technologies and Digital Transformation, Smart Dubai Government

Use case: Blockchain for Government – from concept to reality

11:10 - 11:30

Blockchain for Business Summit

- Using Blockchain technology in property registration process: challenges and the benefits of the project
- Identifying the challenge to government ecosystems: potential use cases and real implementation of Blockchain Technology in government
- Reducing risks of fraud and illegal manipulation
- Using smart contracts in real estate transactions, increasing financial verification
- The opportunity for immediate transfers without third party verification
- Using blockchain for international projects

Participants

Mariam Turashvili - Head of Project Management Department, National Agency of Public Registry, Ministry of Justice, Georgia

Morning break and networking

11:30 - 12:10

Blockchain for Business Summit

LEADERS IN SESSION: BLOCKCHAIN IN GOVERNMENT

11:30 - 12:10

LeadersIn Blockchain roundtables

LeadersIn Blockchain: An opportunity to join closed-door small group roundtable discussions (up to 15 attendees) in 45min blocks, taking place after use case presentations and hosted by speakers from specific verticals to explore the potential of blockchain in that vertical industry.

This particular LeadersIn session will discuss blockchain in government

Participants

Mariam Turashvili - Head of Project Management Department, National Agency of Public Registry, Ministry of Justice, Georgia

SESSIONS

DAY TWO - BLOCKCHAIN FOR BUSINESS SUMMIT - 13/06/2019

Blockchain for Business Summit

12 - 13 June 2019

ExCel
London

Panel debate: What's the role of the regulator in blockchain? Does blockchain even need any regulation, and if so, which kind?

12:10 - 12:40

Blockchain for Business Summit

- Who is the regulator in blockchain?
- Analysing the regulation considerations for blockchain across the world
- To what degree does blockchain regulate itself? Can we get away without regulation?
- How do agencies and regulators easily access blockchains?
- The open approach and focus on data standards - Should blockchain be accessible to all, rather than it becoming a monopoly or oligopoly? Why?

Participants

Panel moderator: James Crawshaw - Senior Analyst, Intelligent Networks & Automation, Heavy Reading

Julie Pierce - Director Openness, Data and Digital, Food Standards Agency

Michael Juenemann - Partner, Bird & Bird

BIM & Blockchain: Challenges and Opportunities in the Construction Sector

12:40 - 13:00

Blockchain for Business Summit

- Why collaborative design is arguably the mechanism for solving most of the global challenges we are facing today
- How the advent of emergent technologies, like Blockchain, and Machine Learning are changing our understanding of the world
- Using the built environment in unforeseen ways with the help of blockchain
- Examples of how with the advent of DLT and Blockchain, there are a number of unprecedented opportunities to leveraged performance in the construction industry and the built environment

Participants

Abel Maciel - Director, Construction Blockchain Consortium

Lunch and networking

13:00 - 14:35

Blockchain for Business Summit

LEADERS IN SESSION: BLOCKCHAIN IN CONSTRUCTION

13:00 - 13:45

LeadersIn Blockchain roundtables

LeadersIn Blockchain: An opportunity to join closed-door small group roundtable discussions (up to 15 attendees) in 45min blocks, taking place after use case presentations and hosted by speakers from specific verticals to explore the potential of blockchain in that vertical industry.

This particular LeadersIn session will discuss blockchain in construction.

Participants

Abel Maciel - Director, Construction Blockchain Consortium

Lunch and networking

13:45 - 14:35

LeadersIn Blockchain roundtables

Roundtables to answer concrete Blockchain in Business questions

14:35 - 15:20

Blockchain for Business Summit

- Moving from the lab to real life: From proof of concept to a real use case in business
- Building the blockchain business models
- The legal aspects of blockchain: From intellectual rights to competition law
- Deciding on public vs. private blockchain
- Interconnecting blockchain with IoT and AI

Participants

Moderated by:: Kate Baucherel - Digital Strategist and COO, City Web Consultants

Group presentations onstage from Roundtables findings

15:20 - 15:35

Blockchain for Business Summit

Participants

Moderated by:: Kate Baucherel - Digital Strategist and COO, City Web Consultants

Panel debate: How to solve the pain points for blockchain in the next 12 months? How to get business value out of blockchain in the next 24 months?

15:35 - 16:05

Blockchain for Business Summit

- How to improve security and infrastructure for blockchain in the short-term
- Will trust issues remain or refrain in the next 12 months?
- How to resolve the challenges around technology and scaling
- What's going to be the next major smart contract platform?
- How do we find a simple and quick method for identifying what blockchain is useful and useless for?
- We need commercial viability for blockchain as soon as possible – How to secure ROI and business value

Participants

Panel moderator: Eric Van der Kleij - Chief Executive, Frontier Network

Vivek Zakarde - Head of Data Analytics, Reliance General Insurance

Mariana Gomez de la Villa - Distributed Ledger Technology Program Director, ING

Ms Sabine Brink - Blockchain Tech Lead, Shell

Sukhi Jutla - Co-founder and COO, MarketOrders

Closing remarks from the Chair

16:05 - 16:15

Blockchain for Business Summit

Participants

Eric Van der Kleij - Chief Executive, Frontier Network

End of Blockchain for Business Summit 2019

16:15 - 16:20

Blockchain for Business Summit
